

Contents

An Efficient 3D Integral Equation Method for Computation of Electromagnetic Wavefields in a Layered Configuration Containing Inhomogeneous Objects	11
A Parallel, Fourier Finite-Element Formulation with an Iterative Solver for the Simulation of 3D LWD Measurements Acquired in Deviated Wells	17
Evaluation of the Sacttering Matrix of Flat Dipoles Embedded in Multilayer Structures	22
Radio Frequency Metrology for Mobile Atmospheric Pressure Plasma Devices	27
Monitoring of Satellite Thermal Pattern in Ocean Front Evolution	32
A New Approach to Mars Ionosphere Characterisation	36
Representation of Einstein's Relativity by Smith's Chart	41
A Toroidal Harmonic Representation of the Yukawa-potential Kernel for a Circular Cylindrical Source	46
GL Acoustic Mechanical and EM Uniform Coupled Modeling and Inversion	52
An Improved Forward Scattering Simulation Technique for Microwave Breast Imaging	60
Extending MAS/TSA Technique for Conducting Environments to Enhance Underwater UXO Discrimination	65
An Analysis of the Landau-Lifshitz Reaction Term in Classical Electrodynamics	70
Convergence of Krylov Solvers and Choice of Basis and Weighting Set of Functions in the Moment Method Solution of Electrical Field Integral Equation	73
Simulation of Relevant Process Variables for Electrochemical Etching	77
Singular Analytical Integration for Efficient Volume Integral Equation Implementation	82
A Study on the Interference in Single Frequency Network and On-Channel Repeater	87
A Novel Ultra-wideband Bandpass Filter	91
The Non-homogeneity of Permittivity in Microwave Dielectric Resonator	95
Genetic Algorithms Applied to Microwave Filters Optimization and Design	99
Novel Fractal Electromagnetic Bandgap Structures to Suppress Simultaneous Switching Noise in High Speed Circuits	104
Free-space Optical Data Link Using Quantum Cascade Laser	108
Multi-band Antenna with Minimalization of Radiation towards Head	112
Electromagnetic Compatibility of the Military Handset with Hidden Authorization Function Based on MIL-STD-461D Results	116
Thermal Design and Electromagnetic Capability Design of the Microwave Power Module	121
The Method of the Calculating of Frequency Characteristics of Image Gaining and Processing Systems	125
A Comparison of Distortion Analyses Based on Volterra Series and Steady State Algorithm	130
Modeling a Transmission Interconnect by Optimal Number of Lumped Sections	135
Removal of Sea Surface Related Wavefields from CSEM Data	139
Preprocessing of Marine CSEM Data and Model Preparation for Frequency-domain 3D Inversion	144
Regularized and Blocky 3D Controlled Source Electromagnetic Inversion	149
Analysis of Complex SAR Raw Data Compression	155

THz Rectangular Patch Microstrip Antenna Design Using Photonic Crystal as Substrate	161
An Efficient BER Analysis of OFDM Systems with ICI Conjugate Cancellation Method	166
A Circularly Polarized Microstrip Ferrite Phase-shifter with Uneven Excitation	172
The Measurement of Angle-of-arrival of Microwave in a Task of Precision Landing of Aircraft	175
On Line Wire Diagnosis by Modified Spread Spectrum Time Domain Reflectometry	182
Coupling Theory of Asymmetric Photonic-crystal Waveguides	187
Anomalous Microwave Transmission in a Superconducting Periodic Multilayer Structure	192
The Layered Metamaterial with Parabolic Dispersion	196
Design of Low-cost Microstrip Antennas for Glonass Applications	199
Design of a 2.5GHz Differential CMOS LNA	203
A Novel Anti-collision Algorithm in RFID System	207
10 GHz Two-stage Class A RF Power Amplifier in a 0.25 μm CMOS Process	211
Inductor Modeling Using 3D EM Design Tool for RF CMOS Process	216
On the Absolute Measure of Wavelengths in Telecommunications	222
Compact Folded Dipole Antenna for DTV Signal Reception	229
Study on Radiation Characteristics of A Conical Conformal Phased Array	233
Application of a SPICE Model for Multiconductor Transmission Lines in Electromagnetic Topology ...	237
Automation of a Clamp Mechanism for EMC Testing	242
An Analytical Characterization of Metal Foams for Shielding Applications	247
Estimation and Validation of Soil Moisture Using PALSAR Onboard ALOS over Mongolian Plateau ..	253
Classing and Extracting Information from Radar Images	257
Sparse, Active Aperture Imaging	261
Wavelet Based Synthesis of Multifractal Rough Surface	266
In-SiP Integration of Electromagnetic Shields	270
Neural Network Modeling of Scattering Parameters from a Conducting Post in Rectangular Waveguide	275
Preparation and Evaluation of Composite Electromagnetic Wave Absorbers Made of Fine Aluminum Particles Dispersed in Polystyrene Medium	279
Composite Electromagnetic Wave Absorber Made of Permalloy or Sendust and Effect of Sendust Particle Size on Absorption Characteristics	286
Stimulated Raman Scattering of Extraordinary Electromagnetic Waves in Weakly Magnetized Plasma	294
Plasmonic Effects in Dynamic Tunable Metal-dielectric Composites	301
Wave Scattering by Multi-valued Random Surfaces	306
Investigation of Pear-shaped Monopole Antenna	311
Design of Multiband Balanced Folded Dipole Antenna Based on a Dual-arm Structure for Mobile Hand- sets	318
Wideband Loaded Wire Bow-tie Antenna for Near Field Imaging Using Genetic Algorithms	322
A Novel CPW-fed Bow-tie Slot Antenna for 5.8GHz RFID Tags	327
A Mode Based Model for Radio Wave Propagation in Storm Drain Pipes	331
Handset Beamforming Synthesis Using PSO for 4G Mobile Communication Systems	336
A New Call Handoff Technique for Next Generation Systems	343
A GLEMFCFS Coupled Modeling and Inversion for Icing Disaster on High Voltage Lines	347
The Computation of Electromagnetic Field on Torus Knots	353
Analysis of a 1:2 Rectangular Waveguide Power Divider for Phased Array Application Using Multiple Cavity Modeling Technique	361

A GL EMFHS Coupled Modeling for Wenchuan Earthquake	369
Retrieval of Higher Order Ocean Wave Spectra from Sunlint	374
Monitoring of Satellite Thermal Pattern of Ocean Front between Coastal and Ocean Water	379
Radar Cross Section of Simple and Complex Targets in the C-band: A Comparison between Anechoic Chamber Measurements and Simulations	382
Analysis of Two-dimensional Scattering by a Periodic Array of Conducting Cylinders Using the Method of Auxiliary Sources	386
The Study of Electromagnetic Wave's Absorbing in Micro-periodical Structure	391
Scattering by Lossless Double-negative Metamaterial Slabs	396
Rectangular Junction Ferrite Component in Millimeter Waves	401
Modelling SIW Resonators Using Support Vector Regression Machines	406
Microwave Unpolar Organic Reactions Using Microwave Absorber	410
A Novel Broadband Compact Circular Disk Microstrip Antenna for Wireless Applications	413
Experimental Investigation of Transformer Coupled Toroidal Discharges	419
Particle-in-cell Simulation of a Novel High Power Terahertz Vacuum Electron Device	425
Bow-tie Wideband Antenna Design for CW THz Photonic Transmitters	431
Accurate Field Distribution Models for RFID Applications Using Hybrid Computational Electromagnetics Techniques	436
Variational Integrators for Maxwell's Equations with Sources	443
Formulation of the MoM in Space Domain with Two Sets of Basis Functions to Analyze a Microstrip Transmission Lines	448
Development, Characterization and Simulation of Flexible Single-Layer X-Band Microwave Absorbers Based on Conducting Polyaniline	452
Numerical Reconstruction of Permeability Material Using 3-D T - Ω Formulation of Finite Element Method	456
Symbolic Derivation of Spectral Green's Functions for Anisotropic Multilayer Structures	461
Design Optimization of an Inverted V-dipole	466
Design of Beam Steering Antenna Array for RFID Reader Using Fully Controlled RF Switches	471
The Design and Optimization of Planar LPDAs	478
Radiation Efficiency of the Metamaterial Zero-order Resonator Antenna	482
The Magnetic Manipulation of Surface Plasmons — Consideration of Possible Technologies	486
Application of the General Theory of Exact Relations to Fiber-reinforced Conducting Composites with Hall Effect	490
Models and Devices Based on Thin-layer Metamaterials	495
Simultaneous Switching Noise Mitigation in High-speed Circuits Using Ring-type High-impedance Surface Structures	501
Design of High Performance FPGA Based Face Recognition System	504
High Sensitivity of Phase-based Surface Plasmon Resonance in Nano-cylinder Array	511
Similarity between Two Targets and Its Application to Polarimetric Target Detection for Sea Area	515
The Effect of Reflectivity Dispersion on Gap Solitons in a Bragg Grating	521
Application of a Modified Broyden's Method in the Finite Difference Method for Electromagnetic Field Solutions	524
The Complex Faraday Tensor for Relativistic Evolution of a Charged Particle in a Constant Field	529
Electromagnetic Information Theory for Wireless and Antenna Systems	534

Spatial Filtering Characteristics of Scattered Fields by Inhomogeneous Waveguide Grids for X-ray Image Diagnosis	539
Propagation and Scattering Characteristics of Microwaves over Forests in WiMAX Wireless Communications Using FDTD Method	546
Parallel Processing of Forward-backward Time-stepping Method for Time Domain Inverse Scattering ..	551
On the Development of Tunable Microwave Devices for Frequency Agile Applications	557
A Compact Ultra-wideband Bandpass Filter with Low Insertion Loss Using Stub Circuits with Defected Ground Structure	562
Measurement of the Dielectric Constant of Liquids Using a Hybrid Cavity-ring Resonator	566
Microwave Assisted Processing of $\text{Sm}(\text{Zn}_{0.5}\text{Ti}_{0.5})\text{O}_3$ and ZnO-TiO_2 Dielectric Resonators	570
Simulation of Multiscale Circuit Problems Using Equivalence Principle Algorithm	576
A Full-wave Wide-band Surface-integral-equation-based Field Solver	582
Evolving a 3-D Model for Determining the Impact of Reference Plane Discontinuities	588
Sensitivity of the Resonance Characteristics of SRR and DSRR (Double-Sided SRR) Type Metamaterials to the Changes in Substrate Parameters and the Usefulness of DSRR Structure for Reduced Electrical Size	598
Calculation Technic of Diffracted Electromagnetic Waves by a Circular Disk of Perfect Conductor Using Multiple Precision Arithmetic	603
Comparison of Optical Pulse Propagation in Water and Acetonitrile	610
Precursors and Broadband Beer's Law: A Discussion on Sub-exponential Decay of Ultrafast Pulses in Water	616
Ultrawideband Dispersive Pulse Propagation in Double-resonance Lorentz Model Dielectrics	621
Conception and Realization of the Manual and Programmable Command of Stimulating Electric Muscular	625
Wave Structure Functions of Multiply Scattered Electromagnetic Waves by Anisotropic Magnetized Turbulent Plasma Layer	631
Electromagnetic Detectability of the Oil Slicks on a Sea Surface in Bistatic Configuration	637
Electromagnetic Waves Propagation above Rough Surface: Application to Natural Surfaces	643
Highly Compact Embedded Duplexer Implementation for WiMAX Dual-band Front-end Module with Organic Package Substrate	650
Application of Defect Induced Microwave Band Gap Structure for Non-destructive Evaluation and the Construction of a Frequency Selector Switch	655
Towards R-space Bose-Einstein Condensation of Photonic Crystal Exciton Polaritons	659
Transmission Lines Based on Metamaterial Structures for Si-MMICs	666
Abnormal Radiation Pattern of Metamaterial Waveguide	670
A New Bandstop Filter Based on Photonic Crystals	674
Power Splitters with Different Output Power Levels Based on Directional Coupling	678
A New Bi-periodic Photonic Crystal Y-splitter	681
Full Wave Analysis for Finlines and Antennas with Metamaterial	684
Electromagnetic Scattering and Filtering in Random Media for Image Sensing	689
Parallel Transmission: A Comprehensive RF Safety Concept	698
Basic and Tailored RF Shimming in a Multi-transmit Whole Body MR System	701
SAR in Parallel Transmission	705
Hypercapnia-induced Changes in Loss Tangent at Microwave Frequencies	710
Self-organized Propagation of Spatiotemporal Dissipative Solitons in Saturating Nonlinear Media	713
Light Scattering by Human Erythrocyte: Different Shape Models	718

An Efficient Space Domain Formulation of the MOM Method for Planar Circuits	722
Scattering from the Flat Strip Geometries in the Layered Medium by Using the Sinc Based Method of Moments	725
Utilizing the Radiative Transfer Equation in Optical Tomography	730
New Metamaterial Using Dynamic Analysis at Millimeter Waves	736
A New Application Metamaterial Antenna	741
Spectral Enhancement of the SPOT Imagery Data to Assess Marine Pollution near Port Said, Egypt ..	746
Modal Propagation Analysis Method for the Design of MMI Coupler Based Microring Resonators	754
Medical Diagnostics Using Reflection Method and Waveguide Probes — Feasibility Study	759
Applicators for Treatment of Atherosclerosis	764
Theory of Evanescent Mode Applicators	767
Design of an Exposure Chamber for Biological Experiments	771
Hyperthermia Applicator for Small Superficial Tumor Treatment	775
Measurement of Yeast Cell Electrical Oscillations around 1 kHz	780
Comparison of Possibilities Utilization Open-resonator Type and Meandering Type of Microwave Applicators for Textile Industry	785
Line Source Wave Scattering by Line Inhomogeneities inside Left-handed Material Slab: Green Function Approach	789
Magnetoplasmons and Quasiparticles for Quantum-dots in Graphene	800
Two-photon Absorption Spectra of Cis- and Trans-bifullerene[60]-pentacene Adducts Based on First-principle Simulation	805
A Novel Parametrically Amplifying Traveling Fast-wave Antenna (PATA) with a High Gain and Directivity as a Modern Version of the Historical Slow-wave Beverage Antenna Utilizing an Induced Fast Surface Wave by an External Sky Wave: Analogous to Traveling-wave Tube Amplification and Negative Resistivity of Esaki Diodes	808
Analysis and Design of Minigenerator	812
An Electric Field Test Using the MRI	817
Numerical Modelling of the Special Light Source with Novel R-FEM Method	822
The Measurement of Temperature Characteristics of Cu Bulk Resistivity	827
Processing of MR Images in Temporomandibular Joint Examination	832
Software Implementation of a New Multi-scale Method for Fractal-shaped Structures' Diffraction Analysis	836
Multilayer Antenna with Metamaterial and Arbitrary Substrate	841
Design and Analysis of Resonant Leaky-mode Broadband Reflectors	846
Design of Two-band 150–220 GHz Superconducting Bolometric Detection Structure	852
Stability and Interactions of Moving Bragg Grating Solitons in a Semi-dual Core System	857
Plastic Optical Fiber Microbend Sensors	861
Design of a Broadband Filter	865
Dynamical Control of Terahertz Metamaterial Resonance Response Using Bimaterial Cantilevers	870
Controlling the Emission of Electromagnetic Source	874
Effect of Losses in a Layered Structure Containing DPS and DNG Media	880
Complex Aberration Effect in Moving Dispersive DNG Media: A Spacetime Algebra Approach	885
Wide Band Gap Semiconductor High-power Coherent THz Source	889
Microwave Characterization of Nickel	893
A Non-surgical Interrogating Vector Field Brain Activity Recovery Method	898

Resonance as a Tool to Transfer Information to Living Systems: The Effect of 7 Hz Calcium Ion Energy Resonance on Human Epithelial Cells (HaCaT) Differentiation	902
Temperature Induced Changes of Spontaneous Photon Emission from Human Hands	907
Author Index	912
